

**DIYLab** — Do It Yourself in Education:  
Expanding Digital Competence To Foster  
Student Agency And Collaborative Learning

## **DO IT YOURSELF**

DIY, or Do It Yourself, is a philosophy that puts the student at the center of the learning experience, by turning her into the maker of her own learning materials.

## **Working with schools**

We are a group of three universities and three primary and secondary education schools, from three different European countries: Spain, Finland and the Czech Republic.

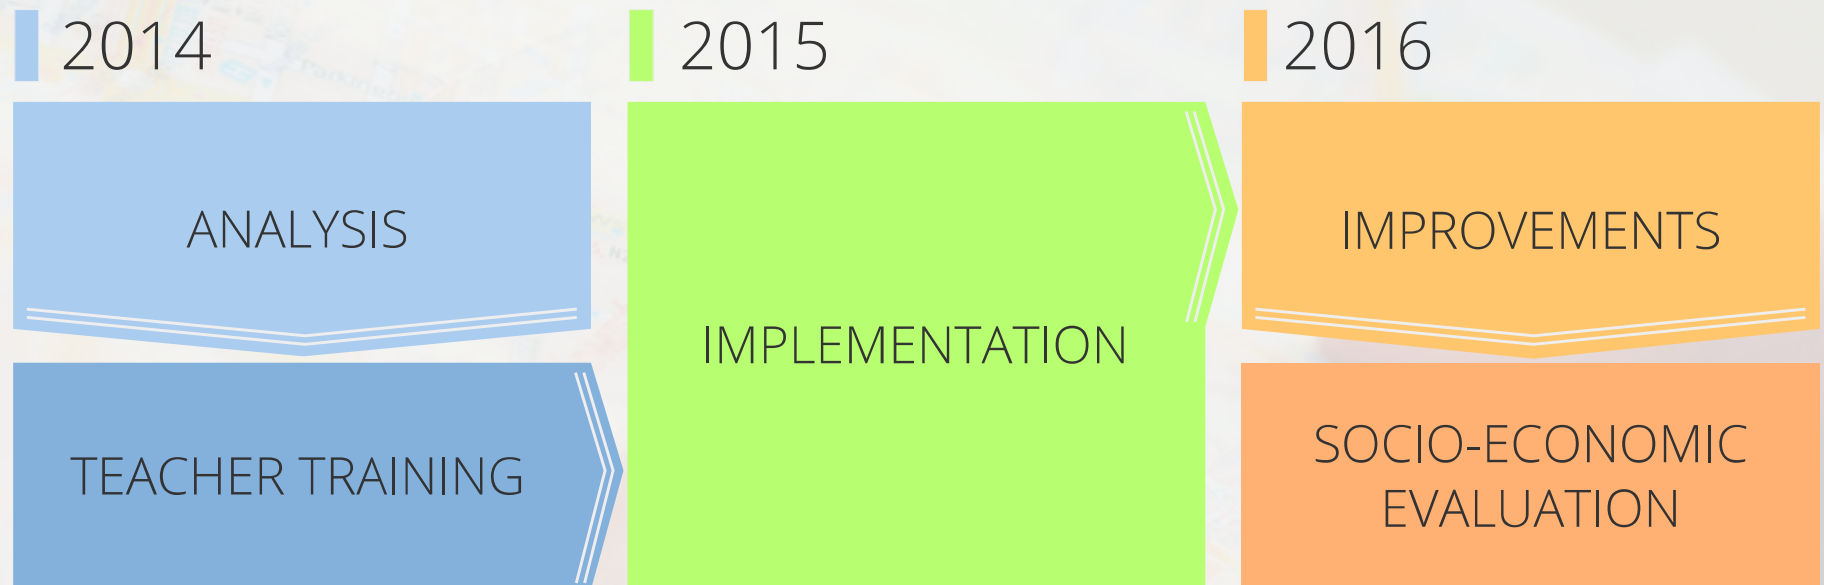

## **Building for the future**

Students will develop their agency, collaboration and digital skills, using the technologies they already have access to today, to make them lifelong and lifewide learners.
